PROFESSIONAL SUMMARY

QA Software Engineer with 1.5+ years of experience specializing in manual, functional, and API testing, alongside hands-on capability in building robust automation frameworks. Experienced in detailed defect investigation, **Root Cause Analysis (RCA)**, and resolving client-reported issues. Strong technical proficiency with **Playwright, JavaScript, and CI/CD tools**, eager to leverage automation and testing expertise to ensure reliable software delivery in Agile environments.

TECHNICAL SKILLS

Automation: Playwright, JavaScript, Test scripts, Cross-Browser Testing, Test automation frameworks (POM)
API Testing: Postman, Swagger, REST API Testing
Manual Testing: Functional, Regression, Integration, UI, Smoke, Sanity
Database: SQL, MySQL
Tools: Jira, Bugzilla, TestRail, Git, GitHub
CI/CD: Jenkins, GitHub Actions, Docker, CI/CD pipeline
Methodologies: Agile/Scrum, SDLC, STLC, Defect Lifecycle, RCA, Bug tracking, Test case management

PROFESSIONAL EXPERIENCE

Software QA Engineer Jun 2025 – Present
Novastrid IT Ventures Pvt Ltd | *Madurai, Tamil Nadu*

- Investigated and resolved 100+ client-reported issues and support tickets by performing detailed defect analysis and Root Cause Analysis (RCA).
- Conducted comprehensive functional, regression, UI, integration, and API testing to validate bug fixes and identify workflow defects.
- Reproduced complex software issues in staging environments and collaborated closely with developers, business teams, and support teams to verify resolutions.
- Managed defect documentation and executed structured retesting procedures utilizing Jira and TestRail within an Agile methodology.

Software QA Intern Feb 2025 – Jun 2025
Amizhth Techno Solution | *Madurai, Tamil Nadu*

- Created and executed manual test cases derived directly from business requirements for active live-project testing activities.
- Identified, documented, and reported functional defects using Bugzilla to support development teams.
- Assisted senior QA members with test planning, execution, and validation cycles.

PERSONAL AUTOMATION PROJECTS

Professional Networking Automation Framework
Playwright, JavaScript

- Built a browser automation script to manage LinkedIn connection requests utilizing dynamic locators and JavaScript logic.
- Programmed safety protocols including execution limits, stop conditions, and automated execution summaries to prevent account restrictions.

Automated Resume Management System
Playwright, JavaScript

- Created an end-to-end Playwright automation script to navigate secure login authentication and successfully automate dynamic resume and file upload workflows.

EDUCATION

B.E. in Electronics & Communication Engineering | K.L.N College of Engineering, (CGPA-8.16) Graduated 2023
