GOWTHAM R

Software QA Engineer | Playwright Automation | CI/CD | Agile

Phone: +91 90922 32782 Email: gowtham101910@gmail.com Location: Madurai, Tamil Nadu, India

PROFESSIONAL SUMMARY

Results-driven **Software QA Engineer** with hands-on experience in **Manual Testing** and **Test Automation** of web applications using **Playwright (JavaScript)**. Proficient in **Functional Testing, Regression Testing, Integration Testing, UI Testing, and API Testing** across full STLC and SDLC cycles. Experienced in building scalable **end-to-end automation frameworks** using the **Page Object Model (POM)** design pattern. Skilled in **CI/CD pipeline** integration with **Jenkins** and **GitHub Actions**, defect management using **JIRA**, and delivering quality in **Agile/Scrum** environments. Committed to improving software quality, accelerating release cycles, and enabling data-driven testing decisions.

TECHNICAL SKILLS

Manual Testing	Functional Testing, Regression Testing, Integration Testing, UI Testing, Smoke Testing, Sanity Testing, API Testing, Defect Lifecycle Management
Automation Testing	Playwright (JavaScript), End-to-End (E2E) Testing, Cross-Browser Testing, Headless Execution, Test Script Development
Framework & Design Patterns	Page Object Model (POM), Test Automation Framework Design, Locator Strategies, Modular Test Architecture
CI/CD & DevOps	Jenkins, Jenkins Pipelines, GitHub Actions, Docker, CI/CD Pipelines, Automated Test Execution
Tools	JIRA, Bugzilla, TestRail, Swagger API, Postman
Database	MySQL (Queries, Data Validation)
Version Control	Git, GitHub
Methodologies	Agile (Scrum), SDLC, STLC, Test Planning, Test Case Design, Bug Reporting
Programming	JavaScript (ES6+)

PROFESSIONAL EXPERIENCE

Software QA Engineer

Jun 2025 – Present

Novastrid IT Ventures Pvt Ltd | Madurai, Tamil Nadu

- Designed and executed comprehensive **manual test cases and automated test scripts** for web applications using **Playwright (JavaScript)**, improving test coverage and early defect detection.
- Performed **Functional, Regression, Integration, UI, and Smoke Testing** to validate product stability across multiple sprint release cycles.
- Built and maintained automation test suites following the **Page Object Model (POM)** framework, reducing manual testing effort and increasing repeatability.
- Reported, tracked, and managed defects throughout the **defect lifecycle** using **JIRA**, ensuring clear communication and timely resolution with development teams.
- Collaborated with developers, product owners, and stakeholders to clarify requirements, review acceptance criteria, and resolve quality issues efficiently.
- Participated in **Agile/Scrum ceremonies** including sprint planning, daily standups, and retrospectives, aligning testing activities with delivery goals.
- Integrated automated tests into **CI/CD pipelines** using **Jenkins** and **GitHub Actions**, enabling continuous automated test execution on code commits.

Software QA Intern *Feb 2025 – Jun 2025*

Amizhth Techno Solution

- Created and executed detailed **test cases and test scenarios** based on business requirements and functional specifications for live projects.
- Identified, documented, and reported software defects during testing cycles, ensuring clear reproduction steps and severity classification.
- Assisted in **test planning, test execution, and validation activities** across multiple application modules, contributing to quality delivery.
- Applied **manual testing techniques** including boundary value analysis, equivalence partitioning, and exploratory testing.
- Worked collaboratively in a team environment, contributing to QA documentation and process improvement initiatives.

PROJECTS

RESUME UPLOAD AUTOMATION

Technologies: Playwright, JavaScript, GitHub

- Developed a robust **Playwright (JavaScript) end-to-end automation solution** to automatically authenticate and upload resumes to web platforms.
- Automated complex workflows including **login authentication, file upload handling**, and post-upload validation using assertion-based checks.
- Eliminated repetitive manual effort, improving operational consistency and reducing process execution time.
- Implemented **cross-browser compatibility** and headless execution modes for flexible and scalable deployment.

LINKEDIN CONNECTION REQUEST AUTOMATION

Technologies: Playwright, JavaScript, GitHub

- Built a full **Playwright browser automation solution** to send LinkedIn connection requests automatically with configurable execution parameters.
- Implemented **execution limits, stop conditions, and error handling logic** to prevent excessive requests and maintain safe execution boundaries.
- Generated structured **execution summary reports** including connection count, success rates, and stop reasons for audit visibility.
- Demonstrated advanced proficiency in **web automation, dynamic locator strategies**, and browser session state management.

EDUCATION

Bachelor of Engineering – Electronics and Communication Engineering (ECE)

K.L.N College of Engineering, Sivaganga, Tamil Nadu

CGPA: 8.16 / 10.0
